Conducting research for a changing society: This is what drives us at Forschungszentrum Jülich. As a member of the Helmholtz Association, we aim to tackle the grand societal challenges of our time and conduct research into the possibilities of a digitized society, a climate-friendly energy system, and a resource-efficient economy. Work together with around 7,100 employees in one of Europe’s biggest research centres and help us to shape change!

We look forward to receiving your application until 01.05.2022 via our Online-Recruitment-System!

Would you like to contribute to solutions for climate change and resource scarcity? Work with us at the Institute of Bio- and Geosciences - Plant Sciences (IBG-2), on innovative utilization, production and technology concepts around the topics of plants, sustainability and bioeconomy. Conduct interdisciplinary research in international or regional teams on state-of-the-art sensors and measurement concepts - in the lab, greenhouse as well as in the field or from the air. Contribute to over 10 years of experience in plant phenotyping and knowledge-based bioeconomy research.

Based on its unique expertise in infrastructures, IBG-2 coordinates the establishment of the pan-European research infrastructure EMPHASIS. EMPHASIS will provide scientists with access to technologies and expertise related to plant phenotyping in Europe. For this purpose, we cooperate with a large number of partners from science, industry and politics in Europe and beyond.

We are looking to recruit a

Scientific Coordinator

Your Job:
• Support in project management on an international level under close coordination with partners from a wide range of fields (science, industry, politics)
• Support in the establishment and operation of a Europe-wide access procedure to research infrastructures in the field of agroecology
• Communication of project content with project partners with representatives from science, industry, politics and the general public
• Conception, organization and coordination of analog, hybrid and web-based events
• Collaboration in the further development of communication strategies around EMPHASIS as well as implementation in concrete measures (e.g. social media, homepage, newsletter, trade fair appearances, exhibitions)

Your Profile:
• Completed scientific university studies in plant / agricultural sciences, ecology or a
natural science or related field, ideally with a PhD
• Experience in science and project management, preferably in projects of the research framework programs Horizon 2020 and/or Horizon Europe
• Experience in the field of science communication
• Ability to work independently and very well in a team
• Intercultural experience and enjoy working with people with diverse experiences, expertise and perspectives
• Strong communication skills and problem-solving skills
• Very good knowledge and expression skills in German and English
• Flexibility and willingness to take on responsibilities in a wide variety of areas as needed away from core duties

Our Offer:
We work on the very latest issues that impact our society and are offering you the chance to actively help in shaping the change! We support you in your work with:
• A large research campus with green spaces, offering the best possible means for networking with colleagues
• Cooperation in a motivated, international and interdisciplinary team at one of the largest research institutions in Europe
• Promotion of professional development through participation in national and international conferences and through various training programs
• Optimal conditions for work-life balance and a family-friendly corporate policy
• Full-time position with the option of slightly reduced working hours and 30 days of annual leave
• Targeted services for international employees, e.g. through our International Advisory Service

We offer you an exciting and varied role in a position initially limited to 3 years with possible long-term prospects. Salary and social benefits in conformity with the provisions of the Collective Agreement for the Civil Service (TVöD).

Forschungszentrum Jülich promotes equal opportunities and diversity in its employment relations.
We also welcome applications from disabled persons.
