Are you interested in modern software engineering? You like to work with people and you are interested in cutting-edge research topics? You believe that only in teams and communities people can perform best?

So do we! At the Jülich Supercomputing Centre (JSC) we operate one of the most powerful computer systems for scientific and technical applications in Europe and make it available for research purposes to scientists at Forschungszentrum Jülich, in Germany, and throughout Europe. Besides running cutting-edge computing systems, we write and support research software for the solution of urgent questions in different domain sciences and participate in national and international initiatives and projects.

Join our team as soon as possible as a

Research Software Engineering Community Manager

Your Job:
- You help us to bring together the research software engineers (RSE) at Forschungszentrum Jülich and to build a community around RSE
- You gather knowledge, available technologies and contacts in the field of RSE and bring together people with similar problems and solutions
- You keep an eye on new trends, techniques, events and opportunities, evaluate them for the software engineers at Forschungszentrum and feed those to the community
- You participate actively in German and international RSE activities such as conferences and workshops, but also joint white papers and projects

Your Profile:
- You have a Master’s degree in the field of computer science, mathematics, engineering, a related discipline or of communication science.
- You have excellent communication skills in English and (ideally) in German, you are not afraid of talking with people across hierarchies
• You should know your way around modern software engineering, but you don’t have to be a professional in this area
• You have first experience with research software on modern hardware

You don’t need to check all the boxes above to apply to this position. We are looking for you as a person, not as a mere profile.

Our Offer:
We work on the very latest issues that impact our society and are offering you the chance to actively help in shaping the change! We support you in your work with:
• A large research campus with green spaces, offering the best possible means for networking with colleagues and pursuing sports alongside work
• Exciting challenges at one of the largest HPC computing centres in Europe
• Comprehensive training courses and individual opportunities for personal and professional further development
• Embedding your work into an interdisciplinary and international research setting
• Comprehensive training courses and individual opportunities for personal and professional further development
• Extensive company health management
• Ideal conditions for balancing work and private life, as well as a family-friendly corporate policy
• Flexible working hours in a full-time position that can also be performed as a part-time job
• 30 days of annual leave and provision for days off between public holidays and weekends (e.g. between Christmas and New Year)
• Targeted services for international employees, e.g. through our International Advisory Service

We offer you an exciting and varied role in an international and interdisciplinary working environment. The position is for a fixed term of 2 years. Salary and social benefits will conform to the provisions of the Collective Agreement for the Public Service (TVöD-Bund) depending on the applicant’s qualifications and the precise nature of the tasks assigned to them.

We welcome applications from people with diverse backgrounds, e.g. in terms of age, gender, disability, sexual orientation/identity, and social, ethnic and religious origin. A diverse and inclusive working environment with equal opportunities in which everyone can realize their potential is important to us.
