

Understanding the dynamics of plant-bacteria-bacteriophage interactions as means to improve plant performance

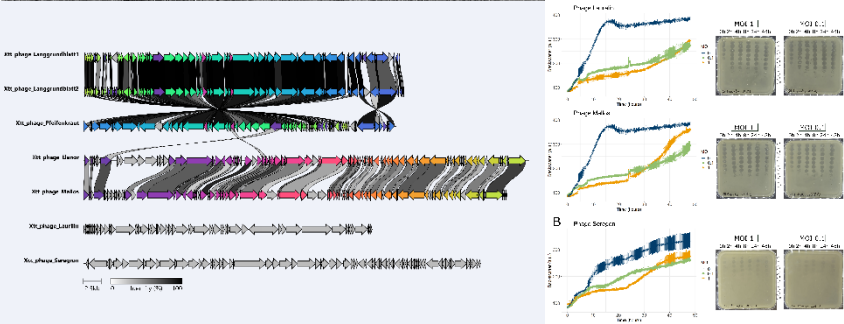

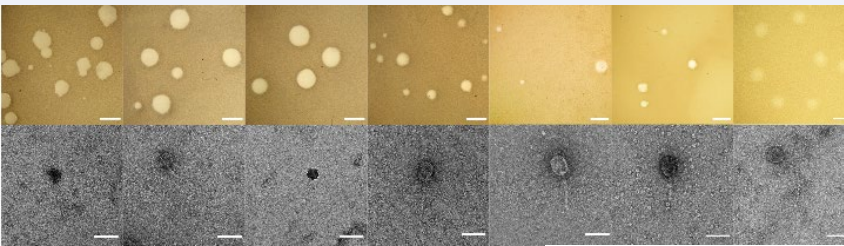

Erdrich H. Sebastian^{1*}, Frunzke Julia², Schurr Ulrich¹ and Arsova Borjana¹

¹Institute of Bio- and Geosciences, Department for Plant Sciences (IBG-2) and ²Department for Biotechnology (IBG-1), Forschungszentrum Juelich, Juelich, Germany

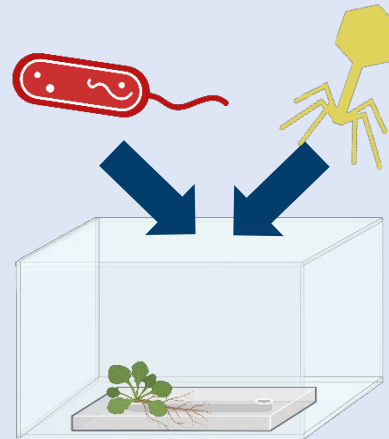

Harnessing natural diversity

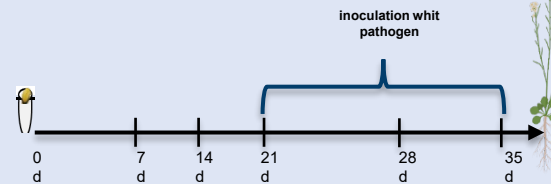

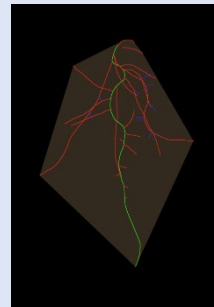

Phages for Biocontrol were isolated from environment samples

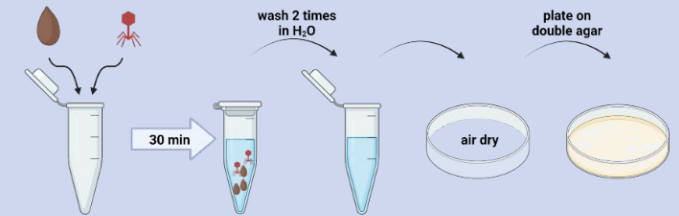

Gnotobiotic growth system

The EcoFab allows continuous phenotyping of the tripartite interaction

Application strategies

Testing different application strategies

Phage stability
