4 References to Sections

A section is referenced as Section 3. A subsection is referenced as Section 3.1. A subsubsection is referenced as Section 3.1.1.

5 Tables and Figures

Number	Number
One	Two
Three	Four

Table 1: A table with four numbers and a long caption. In fact, a very long caption is needed to show multiple line captions.

Letter	Letter	Letter
A	B	X
C	D	Y

Table 2: A table with a short caption.

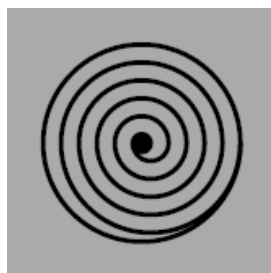

Figure 1: A Figure with a shorter caption.

Tables as, for example, Table 1 and 2 and figures as Figure 1 and 2 can be referenced.

6 Citations

There are several citation commands, e.g. Heinz Maier-Leibnitz Zentrum (2015a), but First & Second (2014) says something else. There are other examples (e.g., Musterfrauet al., 2015); Third, 2013), but the best is Instrument Affiliation (2015). There are also others who state that (Heinz Maier-Leibnitz Zentrum, 2015b).

Figure 2: A figure with a shorter caption.

7 Mathematics

In principal, we have that:

$$a^2 + b^2 = c^2 \quad (1)$$

In addition, we have:

$$A = \pi r^2 \quad (2)$$

We can reference to equations: Equation (1) is the famous Pythagorean theorem. The area of a circle is given in Euquation (2).
