

# Guest Student Programme 2016

Jülich Supercomputing Centre, 1 August - 7 October

## Your assignment

Join our scientists for a 10 week programme and get in touch with cutting-edge research on world-leading supercomputers in the fields of

- Computational Science
- Neuroscience
- Applied Mathematics
- Visualization
- Distributed Computing
- High-Performance Computing

## Your profile

You are or will be a master student with a major in science, mathematics, computer science or engineering? You are excited about programming? Teamwork and flexibility are among your soft skills? Well, this programme is for you!
