

ACCESS GUIDELINES

Project selection criteria

- Originality and scientific value of the proposal
- Interest to the scientific community
- Training benefit to young researchers
- Priority is given to users who have no access to phenotyping infrastructure

To obtain access to JPPC infrastructure:

1. TECHNICAL ASSESSMENT OF PROJECT FEASIBILITY

Contact the platform operator ([Dr. Fabio Fiorani](#)) to ensure if the project is feasible. To assist with this first step, a short proposal is required, which includes: Background and Objectives; a Description of Work (max. two pages). External reviews may be required to support the selection based on the criteria outlined above.

2. PROJECT PRE-PLANNING

Based on the description of work, the platform operator sets a letter of understanding for selected proposals which includes the estimation of access costs and a preliminary the timeframe for the access and project implementation.

3. CONTRACT AND AGREEMENT

In a final step, access to the infrastructure is granted provided that bilateral an agreement regulating intellectual property rights and modalities of access is set in place.
